The voice of geothermal in Europe

Membership Benefits

European Geothermal Energy Council
Our Mission

REPRESENTING THE EUROPEAN GEOTHERMAL INDUSTRY

EGEC is a non-profit international organisation founded in 1998 whose aim is to promote the European geothermal industry and enable its development both in Europe and worldwide, by shaping policy, improving business condition, and driving more research and development.

We are based in Brussels, where we work with our members on policy, market intelligence, and communication, providing a link between the industry and European institutions.

A sound policy framework and financial instruments which allow geothermal energy to compete with traditional sources

Increased research and development

The development of the geothermal industry inside and outside of Europe.
Our members

With more than 130 members from 28 countries, EGEC is a unique geothermal network in Europe, uniting and representing the entire sector.

EGEC members include private companies across the value chain, national associations, consultants, research centres, geological surveys, and public authorities.

The full list of our Members is available in the Membership section of our website.
Top 5 reasons to be a member

1. **GAIN INFLUENCE.** Actively shape European policy that affects the geothermal industry and its market development.

2. **KNOW THE MARKET , STAY INFORMED.** Get access to exclusive market and political analysis, as well as interesting opportunities for the geothermal sector.

3. **GET PERSONALISED SUPPORT** when working with European and international institutions or building initiatives.

4. **ENLARGE YOUR NETWORK** by gaining access to the largest European network of industry leaders.

5. **GET DISCOUNTS** and priority bookings for conferences and events.
Each year, EGEC members receive the exclusive EGEC Geothermal Market Report. Since its first edition in December 2011, the EGEC Geothermal Market Report has come to be seen as the authoritative overview of the entire geothermal sector in Europe, covering subjects ranging from deep geothermal for electric power and district heating to shallow geothermal, in addition to specific issues across the geothermal sector.

Every edition also offers an in-depth review of different geothermal technologies.
Our Activities

EGEC represents its members in relations with the European institutions, offering access to decision-makers and support to influence legislation and European policies.

Members participate in the process through their voluntary contribution to task forces composed by experts from the sector.

Members receive intelligence on regular basis through our monitoring, analysis and research on new regulations and financial developments that affect the geothermal industry.

This includes guidance and advice on EU funds and calls available for the geothermal sector.

EGEC supports promotion and networking between and on behalf of its members to encourage new business opportunities.

Members receive discounts on price of tickets and exhibition space, as well as sponsoring opportunities for greater visibility (studies, webinars, EGC 2022).
How to join

Membership of EGEC is open to private and public bodies operating in the geothermal sector provided that they are located or have operations within Europe.

Membership fees are based on size, turnover, and scope of the body requesting association (see Terms & Conditions).

Apply for membership by completing the online application in the Membership section of our website.

Applications for membership are subject to decision by the EGEC board.

For more information, contact the EGEC Secretariat at com@egec.org
